Proficient in designing user interfaces, developing responsive web applications, and optimizing web performance.

Education

Bachelor of Technology (CSE), Computer Science Engineering Aug 2018 – Aug 2022 | Jalandhar, India

Onkar Public Senior Secondary School, 12th Mar 2017 – Mar 2018

Professional Experience

Envsoft Solutions, Senior Full Stack Developer Dec 2023 – May 2024

- Created comprehensive web applications using a combination of HTML, CSS, JavaScript, React.js, and Node.js for a seamless user experience.
- Leveraged Laravel for backend development, ensuring robust and secure data handling and storage.
- Facilitated smooth project delivery by coordinating with cross-functional teams, including designers and QA engineers.
- Maintained and updated existing applications to adapt to changing user needs and technological advancements.

Nugen IT Services, Full Stack Developer Jan 2021 – Dec 2023 | Mohali, India

- Developed innovative web applications using HTML, CSS, JS, React.js, Node.js, Vue.js, PHP, and Laravel, ensuring a modern and dynamic user experience.
- Integrated advanced technologies such as Node.js and Laravel for backend development, improving system scalability and performance.
- Used PHP and Laravel to build strong, secure, and efficient web applications, making development processes faster and more efficient.
- Worked closely with cross-functional teams to deliver high-quality solutions, aligning technical implementations with business goals and user needs.

Projects

HID Origo Portal (React JS), *HID Origo Portal is a Cloud Based access control admin panel, which includes features like adding/importing users, issuing passes, creating card designs and managing.*

- Cloud-based architecture ensures seamless access and scalability from anywhere, facilitating remote management of access control systems.
- User-friendly interface simplifies the process of adding and importing users, streamlining administrative tasks and reducing manual data entry errors.

- Pass issuance capabilities enable administrators to efficiently grant access permissions to authorized individuals, enhancing security and operational efficiency.
- Customizable card design functionality allows for the creation of visually appealing and branded access cards, enhancing the organization's professional image.
- Reader management features enable administrators to configure and monitor access points, ensuring smooth and secure entry and exit processes.
- Advanced security features, such as multi-factor authentication and access level controls, safeguard sensitive areas and assets.

MICE360 (Vue Js/Laravel), *This is the website builder tool which provides the services ,user-Friendly Event Planning for Beginners,Automated Budget Management,Automated Budget Management.* ☺

- Addressed critical bugs related to complex table data in the Vue.js application, focusing on improving data rendering, sorting, and handling edge cases for a more robust user experience.
- Integrated third-party APIs to facilitate advanced functionalities within the app, such as integration of rich text editing tool(summernote).
- Implemented functionality in the website builder section of the app to incorporate a many features including speech-to-text conversion. .
- Developed a comprehensive testing suite utilizing Jest and Vue Test Utils to ensure the stability and reliability of the application, covering both unit and integration tests for key components and functionalities.

VIBES4US (Node js/ Next JS), *VIBES4US is a streaming based application in which users can upload their own videos or view the entertainment/educational videos*

Designing and implementing RESTful APIs that allow users to upload their videos, manage their content, and retrieve videos for viewing. This involves handling requests, processing data, and ensuring secure communication between the frontend and backend.

- Developing authentication mechanisms to allow users to securely log in, register, and manage their accounts. Implementing authorization logic to control access to certain features or content based on user roles and permissions.
- Integrating with third-party streaming services or developing in-house streaming solutions to enable smooth playback of entertainment and educational videos. This involves managing video streaming protocols, optimizing video delivery, and handling playback errors or interruptions gracefully.

Yooli Cosmetic -Freelance (Next Js), *Yooli Cosmetics introduces a management system designed for Cosmetic Nurses, Boutique Clinics, and Cosmetic Chains. It adheres strictly to industry laws and guidelines, ensuring compliance and operational excellence. Yooli Cosmetics enhances patient experiences and streamlines operations, making it a preferred choice for cosmetic professionals and clinics.*

- Implemented Next.js SSR for improved web performance in Yooli Cosmetics' project.
- Integrated Material-UI and styled CSS to enhance the user interface design.
- Utilized Axios for efficient data fetching, contributing to the overall optimization of the platform.

INDIA CAR KHARIDO - Next Js Based,

Web application for Car dealers who can deal on an online platform and clients can best deal from it.

- Proactively communicated and collaborated with the product owner to gain a comprehensive understanding of the design and acceptance criteria. Worked with the Front-End team to ensure the product's UX was seamless.
- Streamline the development process.
- Implemented SEO optimization strategies, focusing on strategic keyword usage and eective meta-tagging to enhance online visibility.

Estate Explore - Personal Project (MERN)

- Developed a full-stack real estate application using the MERN stack (MongoDB, Express.js, React, Node.js).
- Implemented user authentication and authorization features to secure the application, including user registration, login, and role-based access control.
- Designed a well-optimized MongoDB database to efficiently store and manage property details, considering the relationships between different entities.
- Created a RESTful API using Express.js to handle CRUD operations for properties and other relevant data, enabling seamless communication between the frontend (React) and backend.
- Deployed the application on render to deliver the application.

Pro School ERP(Vue + Laravel)

- Developed to streamline and automate various school operations, ensuring efficient data management and security with a robust Laravel backend.
- Leveraged Vue.js to create dynamic and responsive user interfaces within the main website, enhancing interactivity and user experience.

Technical Skill

Html 5, Css 3, Javascript, React Js, Next Js, Vue3 js (Composition Api, Options Api) ,PHP , Laravel, Pinia store, Prime Vue, MERN Stack Development, Node Js, MongoDB, Express Js, Nest Js, Postgress ,Mysql, Prisma, Bootstrap, Tailwind CSS ,Git ,Typescript, Redux, React-Query, Jest, SASS, Material UI, Storybook ,GraphQL, AWS (Lambda, S3), Firebase, Webhook

Soft Skill

- Team Coordination.
- Client Management.
- Quick Learner
